

Chesterfield County Property Tax Revenue (Residential & Commercial) (2019 – 2026): After all of the spending on Economic Development, for the past 20 years, Roughly 80% of the property tax revenue continues to be from the Residential Property Tax base. The tax burden is mainly born by the residential property tax payers. One would think that more of the tax burden would have shifted to the Commercial sector, if the Economic Development effort was generating a Return On Investment (ROI).
